TECHNICAL SKILLS

Languages: Python, C++, Java(OOPs)

AI/ML: Scikit-learn, NumPy, Pandas, Matplotlib, SeaBorn

Databases: MySQL, PostgreSQL

Tools & Platforms: GitHub, VS Code, Vercel, Google Colab, Jupyter Notebook

Core Concepts: Data Structures & Algorithms, DBMS, OS, CN

EDUCATION

KIET Group of Institutions, Ghaziabad

2023 – 2027

B.Tech - Computer Science and Engineering

Ghaziabad, Uttar Pradesh

Shri Shankar Mumukshu Vidyapeeth

2020 – 2022

Class X & Class XII — Science (PCM)

Shahjahanpur, Uttar Pradesh

EXPERIENCE

AI Intern — CodeAlpha

Jun 2025 – Jul 2025

Internship

- Completed guided projects focused on data cleaning, visualization, and basic model training.
- Used NumPy, Pandas, and Matplotlib for exploratory data analysis.
- Trained and tested simple ML models on small datasets using Google Colab.

PROJECTS

LegalAI – Justice Simplified [🔗](#)

- Developed a multilingual AI-powered legal chatbot to make legal information more accessible and user-friendly.
- Cleaned, preprocessed, and structured legal datasets to improve query interpretation and response quality.
- Optimized chatbot performance for both Hindi and English queries through continuous testing and refinement.
- Collaborated with team members to design, implement, and evaluate the chatbot pipeline.

AI Resume Analyzer

- Developed an AI-powered resume analysis system using text embeddings for semantic understanding.
- Implemented job role recommendations by comparing resume embeddings with predefined role datasets.
- Built a skill-gap analysis module that provides personalized suggestions to improve resume quality.

AI Plagiarism Detector

- Built a plagiarism detection system using embeddings to identify semantic similarity between documents.
- Applied chunk-based comparison techniques to detect both direct and paraphrased plagiarism.
- Designed a similarity scoring and highlighting mechanism to visually represent plagiarized content.

ACHIEVEMENTS

- HackIndia National Hackathon – Team Lead:** Led a 4-member team among 3000+ teams, securing a Top 10 position nationally and contributing to backend development.
- InnoFusion 2.0 Hackathon:** Developed a prototype in 36 hours as part of a team during the hackathon, contributing to implementing core features and basic AI-based functionality while collaborating to build and refine the solution within limited time.
